INDEX TO VOLUME 32

January-December, 1980

AUTHOR INDEX

A

APELIAN, D. *Diffusion Solidification.* G. Langford and D. Apelian. September, p. 28-33.

APELIAN, D. *Filtration: A Melt Refining Method.* D. Apelian and R. Mutharasan. September, p. 14-19.

ASCHENBRENNER, Stanley. *Trace-Element Fingerprinting as a Guide to the Geographic Sources of Native Copper.* George Rapp, Eiler Henrickson, Michael Miller, and Stanley Aschenbrenner. January, p. 35-45.

B

BALE, C.W. *Interactive Computer Tabulation of Thermodynamic Properties with the F*A*C*T System.* W.T. Thompson, C.W. Bale, and A.D. Pelton. December, p. 18-22.

BALLANCE, John B. *Aluminum: Recycling Comes of Age.* February, p. 55-62.

BARR, Robert Q. *Molybdenum Statistics and Technology—1979.* April, p. 60-63.

BARR, Robert Q. *Tungsten Review.* April, p. 62-63.

BAVEREZ, M. *Adsorption of Hydrogen Fluoride on Certain Smelter-Grade Aluminas.* M. Baverez and R. DeMarco. January, p. 10-14.

BEARDMORE, P. *Factors Influencing Automotive Application of High Strength Steels.* C.L. Magee, R.G. Davies, and P. Beardmore. November, p. 28-35.

BEISSWENGER, Hans. *Flexibility of the Fluid-Bed Calciner Process in View of Changing Demands in the Alumina Market.* Hans Werner Schmidt, Hans Beisswenger, and Fritz Kämpf. February, p. 31-39.

BOYER, R.R. *Design Properties of High-Strength Titanium Alloy, Ti-10V-2Fe-3Al.* March, p. 61-65.

BRODY, H.D. *Computer Simulation of Heat Flow in Casting.* H.D. Brody and R.A. Stoehr. September, p. 20-27.

BURTE, H.M. *Developments in Titanium Powder Metallurgy.* F.H. Froes, E. Eylon, G.F. Eichelman, and H.M. Burte. February, p. 47-54.

C

CARPENTER, K.H. *Powder Metallurgy Molybdenum: Influence of Powder Reduction Processes on Properties.* S.M. Tuominen and K.H. Carpenter. January, p. 23-26.

CHANDRA, Dhanesh. *Electron-Optical Characterization of Laterites Treated with a Reduction-Roast/Ammoniacal-Leach System.* Dhanesh Chandra, Richard E. Siemens, and Clayton O. Ruud. May, p. 26-33.

CHEN, G.L. *Cobalt Availability and Superalloys.* J.K. Tien, T.E. Howson, G.L. Chen, and X.S. Xie. October, p. 12-20.

COLDREN, A.P. *Using CCT Diagrams to Optimize the Composition of an As-Rolled Dual-Phase Steel.* A.P. Coldren and G.T. Eldis. March, p. 41-48.

COOPER, Wayne D. *Materials Testing and Automation.* Wayne D. Cooper and Ronald B. Zweigoron. July, p. 17-21.

COX, A.R. *Rapid Solidification Rate Processing and Application to Turbine Engine Materials.* R.J. Patterson II, A.R. Cox, and E.C. van Reuth. September, p. 34-39.

D

DAVENPORT, A.T. *A New HSLA Plate Product with 80 ksi Yield Strength in the As-Rolled Condition.* A.T. Davenport, D.R. DiMicco and D.W. Dickinson. March, p. 28-29.

DAVIES, R.G. *Factors Influencing Automotive Application of High Strength Steels.* C.L. Magee, R.G. Davies, and P. Beardmore. November, p. 28-35.

DEMARCO, R. *Adsorption of Hydrogen Fluoride on Certain Smelter-Grade Aluminas.* M. Baverez and R. DeMarco. January, p. 10-14.

DICKINSON, D.W. *A New HSLA Plate Product with 80 ksi Yield Strength in the As-Rolled Condition.* A.T. Davenport, D.R. DiMicco, and D.W. Dickinson. March, p. 28-29.

DIMICCO, D.R. *A New HSLA Plate Product with 80 ksi Yield Strength in the As-Rolled Condition.* A.T. Davenport, D.R. DiMicco, and D.W. Dickinson. March, p. 28-29.

DUBY, Paul. *Review of Developments in Electrometallurgy 1978-1979.* April, p. 21-25.

E

ECHIGOYA, Takumi. *Effect of Injection Smelting Jet Characteristics on Refractory Wear in the Mitsubishi Process.* Moto Goto and Takumi Echigoya. November, p. 6-11.

EDWARDS, L.L. *General Energy and Material Balance Computer System (GEMS) Applied to Hydrometallurgical Processes.* Hector Izurieta and L.L. Edwards. December, p. 23-31.

EICHELMAN, G.E. *Developments in Titanium Powder Metallurgy.* F.H. Froes, D. Eylon, and H.M. Burte. February, p. 47-54.

ELDIS, G.T. *Using CCT Diagrams to Optimize the Composition of an As-Rolled Dual-Phase Steel.* A.P. Coldren and G.T. Eldis. March, p. 41-48.

EYLON, D. *Developments in Titanium Powder Metallurgy.* F.H. Froes, D. Eylon, G.E. Eichelman, and H.M. Burte. February, p. 47-54.

EYLON, D. *Titanium Powder Metallurgy—A Perspective.* C.A. Kelto, B.A. Kosmal, D. Eylon, and F.H. Froes. August, p. 17-25.

F

FORBERG, Helge. *Status and Outlook for the Aluminum Industry.* April, p. 58-59.

FORM, W. *Unusual Combination of High Strength and Ductility in New Precipitation-Hardenable Nickel Silvers.* W. Form, P. Marechal, and P. Isler. March, p. 53-59.

FROES, F.H. *Developments in Titanium Powder Metallurgy.* F.H. Froes, G.E. Eichelman, and H.M. Burte. February, p. 47-54.

FROES, F.H. *Synthesis of CORONA 5 (Ti-4.5Al-5Mo-1.5Cr).* F.H. Froes and W.T. Highberger. May, p. 57-64.

FROES, F.H. *Titanium Powder Metallurgy—A Perspective.* C.A. Kelto, B.A. Kosmal, D. Eylon, and F.H. Froes. August, p. 17-25.

Contains 60 papers summarizing the most important developments of the last decade in applications, extractive metallurgy, and environmental control for Pb, Zn, and Sn.

Lead-Zinc-Tin '80

Edited by
J. M. Cigan, T. S. Mackey, and T. J. O'Keefe

Proceedings of a World Symposium on Metallurgy and Environmental Control sponsored by the TMS-AIME Lead, Zinc, and Tin Committee at the AIME Annual Meeting in Las Vegas, Nevada, February 24-28, 1980. Hardback, 1045 pages, index.

AIME Members	AIME Students	List Price
$30.00	$15.00	$48.00

Sections include:

- Zinc Extraction
- Lead Smelting and Refining
- New Lead and Zinc Extraction Processes
- Physical Chemistry of Lead, Zinc, and Tin Extraction
- Lead and Zinc Environmental Regulations
- Tin Extraction and Applications
- Zinc Applications and Materials Requirements
- Lead Applications and Materials Requirements
- Lead Recycling

To order, use the order form on the reader service card.

G

GERMAN, R.M. *Color and Color Stability as Alloy Design Criteria.* R.M. German, Matthew M. Guzowski, and David C. Wright. March, p. 20-27.

GOTH, J.W. *The Costs of Regulation to the Metals Industry.* November, p. 17.

GOTO, Moto. *Effect of Injection Smelting Jet Characteristics on Refractory Wear in the Mitsubishi Process.* Moto Goto and Takumi Echigoya. November, p. 6-11.

GOULD, Robert W. *Product Liability.* Robert W. Gould and Robert E. Reed-Hill. August, p. 11.

GREINER, J.D. *Stress Measurement and Bolt Tensioning by Ultrasonic Methods.* J.F. Smith and J.D. Greiner. July, p. 34-36.

GUZOWSKI, Matthew M. *Color and Color Stability as Alloy Design Criteria.* R.M. German, Matthew M. Guzowski, and David C. Wright. March, p. 20-27.

H

HARTLEY, Craig S. *Tensile Testing at Constant True Plastic Strain Rate.* Craig S. Hartley and David A. Jenkins. July, p. 23-28.

HENRICKSON, Eiler. *Trace-Element Fingerprinting as a Guide to the Geographic Sources of Native Copper.* George Rapp, Jr., Eiler Henrickson, Michael Miller, and Stanley Aschenbrenner. January, p. 35-45.

HICKL, A.J. *An Alternate to Cobalt-Base Hardfacing Alloys.* March, p. 6-12.

HIGHBERGER, W.T. *Synthesis of CORONA 5 (Ti-4.5Al-5Mo-1.5Cr).* F.H. Froes and W.T. Highberger. May, p. 57-64.

HOLLAND, J.R. *Engineers Committee on Three Mile Island.* J.R. Holland and M.S. Wechsler. January, p. 34, continued on p. 45.

HOLMES, G. Thomas. *Aluminum Smelting Plant Obsolescence—A Panel Discussion.* Participants: R.M. Kibby, S.T. Solinski, James B. Todd, Jr., G. Thomas Holmes, and J.P. McGeer. October, p. 30-37.

HOWSON, T.E. *Cobalt Availability and Superalloys.* J.K. Tien, T.E. Howson, G.L. Chen, and X.S. Xie. October, p. 12-20.

I

ISAACS, H.S. *Type 304 Stainless Steel with 0.5% Boron for Storage of Spent Nuclear Fuel.* E.A. Loria and H.S. Isaacs. December, p. 10-17.

ISLER, P. *Unusual Combinations of High Strength and Ductility in New Precipitation-Hardenable Nickel Silvers.* W. Form, P. Marechal, and P. Isler. March, p. 53-59.

ITOH, Yoshinori. *Refractories of Flash Furnaces in Japan.* Masao Shima and Yoshinori Itoh. November, p. 12-16.

IZURIETA, Hector. *General Energy and Material Balance Computer System (GEMS) Applied to Hydrometallurgical Processes.* Hector Izurieta and L.L. Edwards. December, p. 23-31.

J

JACOBI, J.S. *Recent Developments in the Recovery of Copper and Associated Metals from Secondary Sources.* February, p. 10-14.

JENKINS, David A. *Tensile Testing at Constant True Plastic Strain Rate.* Craig S. Hartley and David A. Jenkins. July, p. 23-28.

K

KÄMPF, Fritz. *Flexibility of the Fluid-Bed Calciner Process in View of Changing Demands in the Alumina Market.* Hans Werner Schmidt, Hans Beisswenger, and Fritz Kämpf. February, p. 31-39.

KELTO, C.A. *Titanium Powder Metallurgy—A Perspective.* C.A. Kelto, B.A. Kosmal, D. Eylon, and F.H. Froes. August, p. 17-25.

KIBBY, R.M. *Aluminum Smelting Plant Obsolescence—A Panel Discussion.* Participants: R.M. Kibby, S.T. Solinski, James B. Todd, Jr., G. Thomas Holmes, and J.P. McGeer. October, p. 30-37.

KIRBY, Ralph C. *Washington Notes.* Ralph C. Kirby and Ronald A. Munson. March, p. 14-15.

KIRBY, Ralph C. *Washington Notes.* Ralph C. Kirby and Ronald A. Munson. June, p. 150-151.

KIRBY, Ralph C. *Washington Notes.* Ralph C. Kirby and Ronald A. Munson. October, p. 10-11.

KOBAYASHI, S. *In-Situ Observation of Crack Propagation by Transmission Electron Microscopy.* S.M. Ohr and S. Kobayashi. May, p. 35-38.

KOLA, Rolf. *Recovery of Zinc and Lead from Electric-Furnace Steelmaking Dust at Berzelius.* Helmut Maczek and Rolf Kola. January, p. 53-58.

KOSMAL, B.A. *Titanium Powder Metallurgy—A Perspective.* C.A. Kelto, B.A. Kosmal, D. Eylon, and F.H. Froes. August, p. 17-25.

KRYSKO, Wladimir W. *The Birth of Metallurgy.* July, p. 43-45.

L

LANGFORD, G. *Diffusion Solidification.* G. Langford and D. Apelian. September, p. 28-33.

LANGTON, Thomas G. *Economic Aspects of the Bauxite/Aluminum Industry.* August, p. 12-16.

LEPERA, Frank S. *Improved Etching Technique to Emphasize Martensite and Bainite in High-Strength Dual-Phase Steel.* March, p. 38-39.

LORIA, E.A. *Type 304 Stainless Steel with 0.5% Boron for Storage of Spent Nuclear Fuel.* E.A. Loria and H.S. Isaacs. December, p. 10-17.

M

MACZEK, Helmut. *Recovery of Zinc and Lead from Electric-Furnace Steelmaking Dust at Berzelius.* Helmut Maczek and Rolf Kola. January, p. 53-58.

MAGEE, C.L. *Factors Influencing Automotive Application of High Strength Steels.* C.L. Magee, R.G. Davies, and P. Beardmore. November, p. 28-35.

MARECHAL, P. *Unusual Combination of High Strength and Ductility in New Precipitation-Hardenable Nickel Silvers. W. Form, P. Marechal, and P. Isler. March, p. 53-59.*

MAXWELL, Paul C. *Providing Advice to Congress.* December, p. 138-139.

MCGEER, J.P. *Aluminum Smelting Plant Obsolescence—A Panel Discussion.* Participants: R.M. Kibby, S.T. Solinski, James B. Todd, Jr., G. Thomas Holmes, and J.P. McGeer. October, p. 30-37.

MCQUEEN, H.J. *The Experimental Roots of Thermomechanical Treatments for Aluminum Alloys.* February, p. 17-26.

MICHELS, Harold T. *Market Opportunities for Austenitic Stainless Steels in SO_2 Scrubbers.* October, p. 22-29.

MILLER, Michael. *Trace-Element Fingerprinting as a Guide to the Geographic Sources of Native Copper.* George Rapp, Jr., Eiler Henrickson, Michael Miller, and Stanley Aschenbrenner. January, p. 35-45.

MUKHERJEE, Kali. *Brother ... Can You Spare a Grad Student?* August, p. 8-9.

MUKHERJEE, Kali. *1980 Senior Class, Metallurgy/Materials Science.* June, p. 152.

MUNSON, Ronald A. *Washington Notes.* Ralph C. Kirby and Ronald A. Munson. June, p. 14-15.

MUNSON, Ronald A. *Washington Notes.* Ralph C. Kirby and Ronald A. Munson. June, p. 150-151.

MUNSON, Ronald A. *Washington Notes.* Ralph C. Kirby and Ronald A. Munson. October, p. 10-11.

MUTHARASAN, R. *Filtration: A Melt Refining Method.* D. Apelian and R. Mutharasan. September, p. 14-19.

N

NAFZIGER, Ralph H. *Preparation of Specialty Ferrochromium (9 Wt.% C) from a Domestic Chromite.* Ralph H. Nafziger, Philip E. Sanker, and George H. Reynolds. March, p. 49-52.

NARAYAN, J. *Laser Processing of Materials.* June, p. 15-21.

NATIONAL RESEARCH COUNCIL, NATIONAL MATERIALS ADVISORY BOARD. *The Ten Most Critical Issues in Materials.* September, p. 40-41.

NICHOLS, Edward. *The Engineering Societies Library.* Edward Nichols and Richard North. January, p. 59-60.

NORTH, Richard. *The Engineering Societies Library.* Edward Nichols and Richard North. January, p. 59-60.

O

OHR, S.M. *In-Situ Observation of Crack Propagation by Transmission Electron Microscopy.* S.M. Ohr and S. Kobayashi. May, p. 35-38.

P

PATTERSON, R.J. II. *Rapid Solidification Rate Processing and Application to Turbine Engine Materials.* R.J. Patterson II, A.R. Cox, and E.C. van Reuth. September, p. 34-39.

PEACEY, J.G. *Copper Production and Process Developments in Extractive Metallurgy.* April, p. 46-50.

PELTON, A.D. *Interactive Computer Tabulation of Thermodynamic Properties with the F*A*C*T System.* W.T. Thompson, C.W. Bale, and A.D. Pelton. December, p. 18-22.

RAPP, George Jr. *Trace-Element Fingerprinting as a Guide to the Geographic Sources of Native Copper.* George Rapp, Jr., Eiler Henrickson, Michael Miller, and Stanley Aschenbrenner. January, p. 35-45.

REDDY, Bernard J. *Cobalt into the 1980s.* April, p. 56-57.

REED-HILL, Robert E. *Product Liability.* Robert W. Gould and Robert E. Reed-Hill. August, p. 11.

REYNOLDS, George H. *Preparation of Specialty Ferrochromium (9 Wt.% C) from a Domestic Chromite.* Ralph H. Nafziger, Philip E. Sanker, and George H. Reynolds. March, p. 49-52.

RUUD, Clayton O. *Electron-Optical Characterization of Laterites Treated with a Reduction-Roast/Ammoniacal-Leach System.* Dhanesh Chandra, Richard E. Siemens, and Clayton O. Ruud. May, p. 26-33.

S

SANKER, Philip E. *Preparation of Specialty Ferrochromium (9 Wt.% C) from a Domestic Chromite.* Ralph H. Nafziger, Philip E. Sanker, and George H. Reynolds. March, p. 49-52.

SCHEY, John A. *Material Aspects of Friction and Wear in Manufacturing Processes.* January, p. 28-33.

SCHMIDT, Hans Werner. *Flexibility of the Fluid-Bed Calciner Process in View of Changing Demands in the Alumina Market.* Hans Werner Schmidt, Hans Beisswenger, and Fritz Kämpf. February, p. 31-39.

SCHOLZ, William G. *Fracture Toughness of White Cast Irons.* K.H. Zum Gahr and William G. Scholz. October, p. 38-44.

SEE, J. Bruce. *Developments in Chromium — 1979.* April, p. 52-55.

SHIMA, Masao. *Refractories of Flash Furnaces in Japan.* Masao Shima and Yoshinori Itoh. November, p. 12-16.

SIEMENS, Richard E. *Electron-Optical Characterization of Laterites Treated with a Reduction-Roast/Ammoniacal-Leach System.* Dhanesh Chandra, Richard E. Siemens, and Clayton O. Ruud, May, p. 26-33.

SMITH, J.F. *Stress Measurement and Bolt Tensioning by Ultrasonic Methods.* J.F. Smith and J.D. Greiner. July, p. 34-36.

SOHN, Hun-Joon, *Reduction of Chalcopyrite with SO_2 in the Presence of Cupric Ions.* Hun-Joon Sohn and Milton E. Wadsworth. November, p. 18-22.

SOHN, H.Y. *Developments in Physical Chemistry and Basic Principles of Extractive Metallurgy in 1979.* April, p. 16-19.

SOLINSKI, S.T. *Aluminum Smelting Plant Obsolescence—A Panel Discussion.* Participants: R.M. Thomas Holmes, and J.P. McGeer. October, p. 30-37.

STEIN, Dale F. *Leading TMS into the '80s: Interview with Dale F. Stein, 1980 TMS-AIME President.* June, p. 28-32.

STOEHR, R.A. *Computer Simulation of Heat Flow in Casting.* H.D. Brody and R.A. Stoehr. September, p. 20-27.

STRIMEL, Robert S. *Automated Horizontal Tensile Testing Machines for Rapid Quality Control Testing.* July, p. 30-33.

T

TANIMURA, Hiromu. *Development of the Japanese Sword.* February, p. 63-73.

THOMPSON, W.T. *Interactive Computer Tabulation of Thermodynamic Properties with the F*A*C*T System.* W.T. Thompson, C.W. Bale, and A.D. Pelton. December, p. 18-22.

TIEN, J.K. *Cobalt Availability and Superalloys.* J.K. Tien, T.E. Howson, G.L. Chen, and X.S. Xie. October, p. 12-20.

TODD, James B., Jr. *Aluminum Smelting Plant Obsolescence—A Panel Discussion.* Participants: R.M. Kibby, S.T. Solinski, James B. Todd, Jr., G. Thomas Holmes, and J.P. McGeer. October, p. 30-37.

TUOMINEN, S.M. *Powder Metallurgy Molybdenum: Influence of Powder Reduction Processes on Properties.* S.M. Tuominen and K.H. Carpenter. January, p. 23-26.

V

VAN ANTWERPEN, F.J. *Pensions and Engineers.* May, p. 66-67.

VAN REUTH, E.C. *Rapid Solidification Rate Processing and Application to Turbine Engine Materials.* R.J. Patterson II, A.R. Cox, and E.C. van Reuth. September, p. 34-39.

VERINK, Ellis D., Jr. *Non-Fuel Materials — The Next National Crisis?* June, p. 22-25.

W

WADSWORTH, Milton E. *Reduction of Chalcopyrite with SO_2 in the Presence of Cupric Ions.* Hun-Joon Sohn and Milton E. Wadsworth. November, p. 18-22.

WADSWORTH, Milton E. *Review of Developments in Hydrometallurgy — 1979.* April, p. 27-31.

WAYMAN, C.M. *Some Applications of Shape-Memory Alloys.* June, p. 129-137.

WEATHERLY, G.C. *Fracture Control in Engineering Structures.* July, p. 10-11.

WECHSLER, M.S. *Engineers' Committee on Three Mile Island.* J.R. Holland and M.S. Wechsler. January, p. 34, continued on p. 45.

WILLIAMS, David B. *Application of Electron Optical Techniques to Problems in Metallurgical and Materials Engineering.* May, p. 16-24.

WRIGHT, David C. *Color and Color Stability as Alloy Design Criteria.* R.M. German, Matthew W. Guzowski, and David C. Wright. March, p. 20-27.

X

XIE, X.S. *Cobalt Availability and Superalloys.* J.K. Tien, T.E. Howson, G.L. Chen, and X.S. Xie. October, p. 12-20.

Y

YU, Ho. *A Process to Reduce DC Ingot Butt Curl and Swell.* November, p. 23-27.

Z

ZUM GAHR, K.H. *Fracture Toughness of White Cast Irons.* K.H. Zum Gahr and William G. Scholz. October, p. 38-44.

ZWEIGORON, Ronald B. *Materials Testing and Automation.* Wayne D. Cooper and Ronald B. Zweigoron. July, p. 17-21.

SUBJECT INDEX

ABRASION RESISTANCE

Material Aspects of Friction and Wear in Manufacturing Processes. *John Schey.* January, p. 28-33.

AIME ANNUAL MEETING

AIME Annual Meeting Technical Program. December, p. 39-136.

ALUMINUM

Adsorption of Hydrogen Fluoride on Certain Smelter-Grade Aluminas. *M. Baverez and R. DeMarco.* January, p. 10-14.

Aluminum: Recycling Comes of Age. *John B. Ballance.* February, p. 55-62.

Aluminum Smelting Plant Obsolescence—A Panel Discussion. *Participants: R.M. Kibby, S.T. Solinski, James B. Todd, Jr., G. Thomas Holmes, and J.P. McGeer.* October, p. 30-37.

Economic Aspects of the Bauxite/Aluminum Industry. *Thomas G. Langton.* August, p. 12-16.

The Experimental Roots of the Thermomechanical Treatments for Aluminum Alloys. *H.J. McQueen.* February, p. 17-26.

Flexibility of the Fluid-Bed Calciner Process in View of Changing Demands in the Alumina Market. *Hans Werner Schmidt, Hans Beisswenger, and Fritz Kämpf.* February, p. 31-39.

A Process to Reduce DC Ingot Butt Curl and Swell. *Ho Yu.* November, p. 23-27.

Status and Outlook for the Aluminum Industry. *Helge Forberg.* April, p. 58-59.

ATMOSPHERIC EMISSIONS

Market Opportunities for Austenitic Stainless Steels in SO_2 Scrubbers. *Harold T. Michels.* October, p. 22-29.

Recovery of Zinc and Lead from Electric-Furnace Steelmaking Dust at Berzelius. *Helmut Maczek and Rolf Kola.* January, p. 53-58.

CAST IRON

Fracture Toughness of White Cast Irons. *K.H. Zum Gahr and William G. Scholz.* October, p. 38-44.

COBALT

An Alternate to Cobalt-Base Hardfacing Alloys. *A.J. Hickl.* March, p. 6-12.

Cobalt Availability and Superalloys. *J.K. Tien, T.E. Howson, G.L. Chen, and X.S. Xie.* October, p. 12-20.

Cobalt into the 1980s. *Bernard J. Reddy.* April, p. 56-57.

COLOR EVALUATION

Color and Color Stability as Alloy Design Criteria. *R.M. German, Matthew M. Guzowski, and David C. Wright.* March, p. 20-27.

COMPUTER METHODS

Automated Horizontal Tensile Testing Machines for Rapid Quality Control Testing. *Robert S. Strimel.* July, p. 30-33.

General Energy and Material Balance Computer System (GEMS) Applied to Hydrometallurgical Processes. *Hector Izurieta and L.L. Edwards.* December, p. 23-31.

Interactive Computer Tabulation of Thermodynamic Properties with the F*A*C*T System. *W.T. Thompson, C.W. Bale, and A.D. Pelton.* December, p. 18-22.

Materials Testing and Automation. *Wayne D. Cooper and Ronald B. Zweigoron.* July, p. 17-21.

Tensile Testing at Constant True Plastic Strain Rate. *Craig S. Hartley and David A. Jenkins.* July, p. 23-28.

COPPER

Copper Production and Process Developments in Extractive Metallurgy. *J.G. Peacey.* April, p. 46-50.

Effect of Injection Smelting Jet Characteristics on Refractory Wear in the Mitsubishi Process. *Moto Goto and Takumi Echigoya.* November, p. 6-11.

Recent Developments in the Recovery of Copper and Associated Metals from Secondary Sources. *J.S. Jacobi.* February, p. 10-14.

Reduction of Chalcopyrite with SO_2 in the Presence of Cupric Ions. *Hun-Joon Sohn and Milton E. Wadsworth.* November, p. 18-22.

Refractories of Flash Furnaces in Japan. *Masao Shima and Yoshinori Itoh.* November, p. 12-16.

Trace-Element Fingerprinting as a Guide to the Geographic Sources of Native Copper. *George Rapp, Jr., Eiler Henrickson, Michael Miller, and Stanley Aschenbrenner.* January, p. 35-45.

DENTAL ALLOYS

Color and Color Stability as Alloy Design Criteria. *R.M. German, Matthew M. Guzowski, and David C. Wright.* March, p. 20-27.

DUAL-PHASE STEELS

Improved Etching Technique to Emphasize Martensite and Bainite in High-Strength Dual-Phase Steel. *Frank S. LePera.* March, p. 38-39.

Using CCT Diagrams to Optimize the Composition of an As-Rolled Dual-Phase Steel. *A.P. Coldren and G.T. Eldis.* March, p. 41-48.

ELECTROMETALLURGY

Review of Developments in Electrometallurgy 1978-1979. *Paul Duby.* April, p. 21-25.

ELECTRON MICROSCOPY

Application of Electron Optical Techniques to Problems in Metallurgical and Materials Engineering. *David B. Williams.* May, p. 16-24.

Electron-Optical Characterization of Laterites Treated with a Reduction-Roast/Ammoniacal-Leach System. *Dhanesh Chandra, Richard E. Siemens, and Clayton O. Ruud.* May, p. 26-33.

In-Situ Observation of Crack Propagation by Transmission Electron Microscopy. *S.M. Ohr and S. Kobayashi.* May, p. 35-38.

ENGINEERING SOCIETIES LIBRARY

The Engineering Societies Library. *Edward Nichols and Richard North.* January, p. 59-60.

ETCHANTS

Improved Etching Technique to Emphasize Martensite and Bainite in High-Strength Dual-Phase Steel. *Frank S. LePera.* March, p. 38-39.

FALL MEETING TECHNICAL PROGRAM

1980 TMS Fall Meeting Technical Program. August, p. 59.

FERROCHROMIUM

Developments in Chromium — 1979. *J. Bruce See.* April, p. 52-55.

Preparation of Specialty Ferrochromium (9 Wt.% C) from a Domestic Chromite. *Ralph H. Nafziger, Philip E. Sanker and George H. Reynolds.* March, p. 49-52.

FILTRATION

Filtration: A Melt Refining Method. *D. Apelian and R. Mutharasan.* September, p. 14-19.

FRACTURE

Fracture Control in Engineering Structures. *G.C. Weatherly.* July, p. 10-11.

Fracture Toughness of White Cast Irons. *K.H. Zum Gahr and William G. Scholz.* October, p. 38-44.

In-Situ Observation of Crack Propagation by Transmission Electron Microscopy. *S.M. Ohr and S. Kobayashi.* May, p. 35-38.

GEM (Government, Energy, and Materials Affairs)

Brother . . . Can You Spare a Grad Student? *Kali Mukherjee.* August, p. 8-9.

The Costs of Regulation to the Metals Industry. *J.W. Goth.* November, p. 17.

Engineers' Committee on Three Mile Island. *J.R. Holland.* January, p. 34, continued on p. 45.

Non-Fuel Materials – The Next National Crisis? *Ellis D. Verink, Jr.* June, p. 22-25.

Pensions and Engineers. *F.J. Van Antwerpen.* May, p. 66-67.

Product Liability. *Robert W. Gould and Robert E. Reed-Hill.* August, p. 11.

Providing Advice to Congress. *Paul C. Maxwell.* December, p. 138-139.

The Ten Most Critical Issues in Materials. *National Research Council, National Materials Advisory Board.* September, p. 40-41.

Washington Notes. *Ralph C. Kirby and Ronald A. Munson.* March, p. 14-15.

Washington Notes. *Ralph C. Kirby and Ronald A. Munson.* June, p. 150-151.

Washington Notes. *Ralph C. Kirby and Ronald A. Munson.* October, p. 10-11.

HARDFACING ALLOYS

An Alternate to Cobalt-Base Hardfacing Alloys. *A.J. Hickl.* March, p. 6-12.

HIGH-STRENGTH LOW-ALLOY STEELS

Factors Influencing Automotive Application of High Strength Steels. *C.L. Magee, R.G. Davies, and P. Beardmore.* November, p. 28-35.

A New HSLA Plate Product with 80 ksi Yield Strength in the As-Rolled Condition. *A.T. Davenport, D.R. DiMicco, and D.W. Dickinson.* March, p. 28-29.

HISTORY OF METALLURGY

The Birth of Metallurgy. *Wladimir W. Krysko.* July, p. 43-45.

Development of the Japanese Sword. *Hiromu Tanimura.* February, p. 63-73.

HYDROMETALLURGY

Developments in Physical Chemistry and Basic Principles of Extractive Metallurgy in 1979. *H.Y. Sohn.* April, p. 16-19.

Electron-Optical Characterization of Laterites Treated with a Reduction-Roast/Ammoniacal-Leach System. *Dhanesh Chandra, Richard E. Siemens, and Clayton O. Ruud.* May, p. 26-33.

General Energy and Material Balance Computer System (GEMS) Applied to Hydrometallurgical Processes. *Hector Izurieta and L.L. Edwards.* December, p. 23-31.

Interactive Computer Tabulation of Thermodynamic Properties with the F*A*C*T System. *W.T. Thompson, C.W. Bale, and A.D. Pelton.* December, p. 18-22.

Reduction of Chalcopyrite with SO_2 in the Presence of Cupric Ions. *Hun-Joon Sohn and Milton E. Wadsworth.* November, p. 18-22.

Review of Developments in Hydrometallurgy – 1979. *Milton E. Wadsworth.* April, p. 27-31.

LASERS

Laser Processing of Materials. *J. Narayan.* June, p. 15-21.

LATERITES

Electron-Optical Characterization of Laterites Treated with a Reduction-Roast/Ammoniacal-Leach System. *Dhanesh Chandra, Richard E. Siemens, and Clayton O. Ruud.* May, p. 26-33.

MELTING AND CASTING

Computer Simulation of Heat Flow in Casting. *H.D. Brody and R.A. Stoehr.* September, p. 20-27.

Diffusion Solidification. *G. Langford and D. Apelian.* September, p. 28-33.

Filtration: A Melt Refining Method. *D. Apelian and R. Mutharasan.* September, p. 14-19.

A Process to Reduce DC Ingot Butt Curl and Swell. *Ho Yu.* November, p. 23-27.

Rapid Solidification Rate Processing and Application to Turbine Engine Materials. *R.J. Patterson II, A.R. Cox, and E.C. van Reuth.* September, p. 34-39.

MEMBERSHIP DIRECTORY

TMS-AIME Membership Directory. June: listing in alphabetical order, p. 43-95; listing in geographical order, p. 97-128.

MINERALS AVAILABILITY

Non-Fuel Materials—The Next National Crisis? *Ellis D. Verink, Jr.* June, p. 22-25.

The Ten Most Critical Issues in Materials. *National Research Council, National Materials Advisory Board.* September, p. 40-41.

MOLYBDENUM

Molybdenum Statistics and Technology – 1979. *Robert Q. Barr.* April, p. 60-63.

Powder Metallurgy Molybdenum: Influence of Powder Reduction Processes on Properties. *S.M. Tuominen and K.H. Carpenter.* January, p. 23-26.

NICKEL SILVERS

Unusual Combination of High Strength and Ductility in New Precipitation-Hardenable Nickel Silvers. *W. Form, P. Marechal, and P. Isler.* March, p. 53-59.

NUCLEAR ENERGY

Engineers Committee on Three Mile Island. *J.R. Holland.* January, p. 34, continued on p. 45.

Types 304 Stainless Steel with 0.5% Boron for Storage of Spent Nuclear Fuel. *E.A. Loria and H.S. Isaacs.* December, p. 10-17.

POWDER METALLURGY

Developments in Titanium Powder Metallurgy. *F.H. Froes, D. Eylon, and H.M. Burte.* February, p. 47-54.

Powder Metallurgy Molybdenum: Influence of Powder Reduction Processes on Properties. *S.M. Tuominen and K.H. Carpenter.* January, p. 23-26.

Titanium Powder Metallurgy—A Perspective. *C.A. Kelto, B.A. Kosmal, D. Eylon, and F.H. Froes.* August, p. 17-25.

PRODUCT LIABILITY

Product Liability. *Robert W. Gould and Robert E. Reed-Hill.* August, p. 11.

PYROMETALLURGY

Developments in Physical Chemistry and Basic Principles of Extractive Metallurgy in 1979. *H.Y. Sohn.* April, p. 16-19.

Effect of Injection Smelting Jet Characteristics on Refractory Wear in the Mitsubishi Process. *Moto Goto and Takumi Echigoya.* November, p. 6-11.

Refractories of Flash Furnaces in Japan. *Masao Shima and Yoshinori Itoh.* November, p. 12-16.

RECYCLING

Aluminum: Recycling Comes of Age. *John B. Ballance.* February, p. 55-62.

Recent Developments in the Recovery of Copper and Associated Metals from Secondary Sources. *J.S. Jacobi.* February, p. 10-14.

REFRACTORIES

Effect of Injection Smelting Jet Characteristics on Refractory Wear in the Mitsubishi Process. *Moto Goto and Takumi Echigoya.* November, p. 6-11.

Refractories of Flash Furnaces in Japan. *Masao Shima and Yoshinori Itoh.* November, p. 12-16.

SHAPE-MEMORY ALLOYS

Some Applications of Shape-Memory Alloys. *C.M. Wayman.* June, p. 129-137.

SOLIDIFICATION

Computer Simulation of Heat Flow in Casting. *H.D. Brody and R.A. Stoehr.* September, p. 20-27.

Diffusion Solidification. *G. Langford and D. Apelian.* September, p. 28-33.

A Process to Reduce DC Ingot Butt Curl and Swell. *Ho Yu.* November, p. 23-27.

Rapid Solidification Rate Processing and Application to Turbine Engine Materials. *R.J. Patterson II, A.R. Cox, and E.C. van Reuth.* September, p. 34-39.

STAINLESS STEELS

Market Opportunities for Austenitic Stainless Steels in SO_2 Scrubbers. *Harold T. Michels.* October, p. 22-29.

Type 304 Stainless Steel with 0.5% Boron for Storage of Spent Nuclear Fuel. *E.A. Loria and H.S. Isaacs.* December, p. 10-17.

STEELMAKING

Recovery of Zinc and Lead from Electric-Furnace Steelmaking Dust at Berzelius. *Helmut Maczek and Rolf Kola.* January, p. 53-58.

STRESS MEASUREMENT

Automated Horizontal Tensile Testing Machines for Rapid Quality Control Testing. *Robert S. Strimel.* July, p. 30-33.

Materials Testing and Automation. *Wayne C. Cooper and Ronald B. Zweigoron.* July, p. 17-21.

Stress Measurement and Bolt Tensioning by Ultrasonic Methods. *J.F. Smith and J.D. Greiner.* July, p. 34-36.

Tensile Testing at True Plastic Strain Rate. *Craig S. Hartley and David A. Jenkins.* July, p. 23-28.

STUDENT AFFAIRS

Brother . . . Can You Spare a Grad Student? *Kali Mukherjee.* August, p. 8-9.

1980 Senior Class, Metallurgy/Materials Science. *Kali Mukherjee.* June, p. 152.

SUPERALLOYS

Cobalt Availability and Superalloys. *J.K. Tien, T.E. Howson, G.L. Chen, and X.S. Xie.* October, p. 12-20.

TENSILE TESTING

Automated Horizontal Tensile Testing Machines for Rapid Quality Control Testing. *Robert S. Strimel.* July, p. 30-33.

Materials Testing and Automation. *Wayne D. Cooper and Ronald B. Zweigoron.* July, p. 17-21.

Tensile Testing at Constant True Plastic Strain Rate. *Craig S. Hartley and David A. Jenkins.* July, p. 23-28.

THERMOMECHANICAL TREATMENT

The Experimental Roots of Thermomechanical Treatments for Aluminum Alloys. *H.J. McQueen.* February, p. 17-26.

TITANIUM

Developments in Titanium Powder Metallurgy. *F.H. Froes, D. Eylon, G.E. Eichelman, and H.M. Burte.* February, p. 47-54.

TITANIUM ALLOYS

Design Properties of a High-Strength Titanium Alloy, Ti-10V-2Fe-3Al. *R.R. Boyer.* March, p. 61-65.

Synthesis of CORONA 5(Ti-4.5Al-5Mo-1.5Cr). *F.H. Froes and W.T. Highberger.* May, p. 57-64.

Titanium Powder Metallurgy—A Perspective. *C.A. Kelto, B.A. Kosmal, D. Eylon, and F.H. Froes.* August, p. 17-25.

TMS PRESIDENT INTERVIEW

Leading TMS in the '80s: Interview with Dale F. Stein, 1980 TMS-AIME President. June, p. 28-32.

TRIBOLOGY

Material Aspects of Friction and Wear in Manufacturing Processes. *John A. Schey.* January, p. 28-33.

TUNGSTEN

Tungsten Review. *Robert Q. Barr.* April, p. 62-63.

ULTRASONICS

Stress Measurement and Bolt Tensioning by Ultrasonic Methods. *J.F. Smith and J.D. Greiner.* July, p. 34-36.

ZINC EXTRACTIVE METALLURGY

Recovery of Zinc and Lead from Electric-Furnace Steelmaking Dust at Berzelius. *Helmut Maczek and Rolf Kola.* January, p. 53-58.
